1986 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 663–667; each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 667–668, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 668–672 lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1986, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Base Drag Determination for STS Flights 1-5 A86-096
Cone-Derived Waveriders with Longitudinal Curvature A86-080
Turbulent Reynolds Analogy Factors of Stacked Large-Eddy Breakup Devices A86-059
Application of a Full Potential Method for Predicting Supersonic Flowfields and Aerodynamic Characteristics A86-009

Configuration Design

Cone-Derived Waveriders with Longitudinal Curvature A86-080

Deceleration Systems

A New Rotating Parachute Design Having High Performance A86-039

Handling Qualities, Stability and Control

Unsteady Embedded Newton-Busemann Flow Theory A86-024

Stealth

Boron Slurry-Fueled Jet Engine Exhaust Plume Infrared Signatures A86-090

Structural Design (including Loads)

Impact Damage of the Challenger Crew Compartment A86-112
Axisymmetric Stress Fields in Involute Bodies of Revolution A86-030

Testing, Flight and Ground

Base Drag Determination for STS Flights 1-5 A86-096

Vibration

Extension of Ground-Based Testing for Large Space Structures A86-033

Energy

Cryogenics

Catastrophic Heat Load on a Solid-Hydrogen Dewar A86-074

Reciprocating Machinery

Conceptual Fluid-Dynamic Heat Rejection System for Space Station Application A86-099

Solar Power Satellites

Computer Simulation of Plasma Electron Collection by PIX-II A86-088

Fluid Dynamics

Aeroacoustics

A Navier-Stokes Solution for a Bulbous Payload Shroud A86-103

Boundary Layers and Convective Heat Transfer-Laminar

Measured and Predicted Heating Distributions for Biconics at Mach 10 A86-044

Boundary Layers and Convective Heat Transfer-Turbulent

Turbulent Reynolds Analogy Factors of Stacked Large-Eddy Breakup Devices A86-059

Boundary-Layer Stability and Transition

A New Hypothesis for Transition on the Windward Face of the Space Shuttle A86-105
Rocket Nozzle Lip Flow by Direct Simulation Monte Carlo Method A86-063
Active Control of Asymmetric Vortex Effects in a Circular Cylinder A86-025

Computational Methods

Evaluation of Free-Molecular Flow Passage Conductances with Thermal Radiation Analysis Software A86-109
Supersonic Flow over a Cruciform Configuration at Angle of Attack A86-078
Catastrophic Heat Load on a Solid-Hydrogen Dewar A86-074
Space Shuttle Orbiter Molecular Environment Induced by the Supplemental Flash Evaporator System A86-066
Rocket Nozzle Lip Flow by Direct Simulation Monte Carlo Method A86-063
Numerical Solution of Space Shuttle Orbiter Flowfield Including Real-Gas Effects A86-046
Three-Dimensional Flow in Rotating Rocket Motor Nozzles A86-037
Evaluation of Boundary-Layer and Parabolized Navier-Stokes Solutions for Re-Entry Vehicles A86-010
Application of a Full Potential Method for Predicting Supersonic Flowfields and Aerodynamic Characteristics A86-009

Hydrodynamics

Impact Damage of the Challenger Crew Compartment A86-112
Applications to Space Operations of Free-Flying, Controlled Streams of Liquids A86-072

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Thrust Vector Control Utilizing Asymmetric Jet Nozzles A86-113
Thermal Environment Around the Space Shuttle with Hot-Gas Jets for Ice Suppression A86-097
Attitude Control Thruster Plume Flow Modeling and Experiments A86-082
Applications to Space Operations of Free-Flying, Controlled Streams of Liquids A86-072
Experimental Study of the Plume Impingement Problem Associated with Rocket Stage Separation A86-064
Pitot Pressure and Heat-Transfer Measurements in Hydrazine Thruster Plumes A86-062
Aluminized Propellants and a Method Defining Low-Altitude Exhaust Plumes A86-038
Charging of a Manned Maneuvering Unit in the Shuttle Wake A86-021

Nonsteady Aerodynamics

Dynamic Stability Tests on Finned Bodies at Hypersonic Mach Number A86-117
Second-Order Roll Damping of Rolling Wings at Supersonic Speeds A86-116
Unsteady Embedded Newton-Busemann Flow Theory A86-024
Parametric Investigations of Slender Cone Nose Bluntness Effects A86-023

Nozzle and Channel Flow

Thrust Vector Control Utilizing Asymmetric Jet Nozzles A86-113

Evaluation of Free-Molecular Flow Passage Conductances with Thermal Radiation Analysis Software A86-109
Design and Optimization of Propulsion Systems Employing Scarfed Nozzles A86-104
Rocket Nozzle Lip Flow by Direct Simulation Monte Carlo Method A86-063
Three-Dimensional Flow in Rotating Rocket Motor Nozzles A86-037
Performance Analysis of Scarfed Nozzles A86-008

Plasmadynamics and MHD

$\vec{V}\times\vec{B}$ and Density Gradient Electric Fields Measured from Spacecraft A86-114
Charging of a Manned Maneuvering Unit in the Shuttle Wake A86-021
Three-Dimensional Refraction/Diffraction of Electromagnetic Waves Through Rocket Exhaust Plumes A86-006

Rarefied Flows

Evaluation of Free-Molecular Flow Passage Conductances with Thermal Radiation Analysis Software A86-109
Computation of Low-Density Supersonic Flow over a Pitot Tube A86-075
An Estimate of the Outgassing of Space Payloads and Its Gaseous Influence on the Environment A86-065
Experimental Study of the Plume Impingement Problem Associated with Rocket Stage Separation A86-064
Determining Atmospheric Density Using a Space-Launched Projectile A86-047
Rarefied-Flow Aerodynamics and Thermosphere Structure from Shuttle Flight Measurements A86-003

Subsonic Flow

Turbulent Reynolds Analogy Factors of Stacked Large-Eddy Breakup Devices A86-059
Prediction of Flowfields About Bodies of Revolution at Large Incidence A86-043

Supersonic and Hypersonic Flow

Dynamic Stability Tests on Finned Bodies at Hypersonic Mach Number A86-117
Second-Order Roll Damping of Rolling Wings at Supersonic Speeds A86-116
Cone-Derived Waveriders with Longitudinal Curvature A86-080
Supersonic Flow over a Cruciform Configuration at Angle of Attack A86-078
Computation of Low-Density Supersonic Flow over a Pitot Tube A86-075
Experimental Study of the Plume Impingement Problem Associated with Rocket Stage Separation A86-064
A Parabolized Navier-Stokes Prediction of Hypersonic Window Cooling A86-048
Numerical Solution of Space Shuttle Orbiter Flowfield Including Real-Gas Effects A86-046
Unsteady Embedded Newton-Busemann Flow Theory A86-024
Parametric Investigations of Slender Cone Nose Bluntness Effects A86-023
Evaluation of Boundary-Layer and Parabolized Navier-Stokes Solutions for Re-Entry Vehicles A86-010
Hypersonic Finite-Rate Chemically Reacting Viscous Flows over an Ablating Carbon Surface A86-007

Transonic Flow

A Navier-Stokes Solution for a Bulbous Payload Shroud A86-103
Magnus Effects at High Angles of Attack and Critical Reynolds Numbers
Magnus Effects on Spinning Transonic Finned Missiles A86-005

Viscous Nonboundary-Layer Flows

Computation of Low-Density Supersonic Flow over a Pitot Tube A86-075
A Parabolized Navier-Stokes Prediction of Hypersonic Window Cooling A86-048
Prediction of Flowfields About Bodies of Revolution at Large Incidence A86-043

Wave Motion and Sloshing

Digital Data Analysis Techniques for Extraction of Slosh Model Parameters A86-031

Interdisciplinary Topics

Analytical and Numerical Methods

$\vec{V}\times\vec{B}$ and Density Gradient Electric Fields Measured from Spacecraft A86-114
The Effect of Geometry on Contact Conductance of Contiguous Interfaces A86-040
Three-Dimensional Refraction/Diffraction of Electromagnetic Waves Through Rocket Exhaust Plumes A86-006

Astrodynamics

Damping Synthesis for a Spacecraft Using Substructure and Component Data A86-029
Quasicircular Ground Tracks for Geosynchronous Earth Satellites A86-027
Tethers and Asteroids for Artificial Gravity Assist in the Solar System A86-011

Atmospheric and Space Sciences

$\vec{V}\times\vec{B}$ and Density Gradient Electric Fields Measured from Spacecraft A86-114
Radiative Lifetime Analysis of the Shuttle Optical Glow A86-110
A Consideration of Atomic Oxygen Interactions with the Space Station A86-087
Space Shuttle Orbiter Molecular Environment Induced by the Supplemental Flash Evaporator System A86-066
The Upper Atmosphere Composition Spectrometer A86-056
Space Plasma Physics Results from Spacelab 1 A86-055
Vehicle Charging Observed in SEPAC Spacelab-1 Experiment A86-035
Space Vehicle Glow Measurements on STS 41-D A86-034
Shielding Distribution for Anisotropic Radiation in Low Earth Orbit A86-016
Cryogenic and Thermal Design for the Space Infrared Telescope Facility (SIRTF) A86-004

Celestial Mechanics

Path-Constrained Rendezvous: Necessary and Sufficient Conditions A86-085

Human Factors

Impact Damage of the Challenger Crew Compartment A86-112
Threat-Strategy Technique: A System Safety Tool for Advanced Design A86-036

Numerical Analysis

Comparison of Various Drag Coefficient Expansions Using Polynomials and Splines A86-045

Reliability, Maintainability, and Logistics Support

Stress Response of Rocket Motors to Environmental Thermal Loads A86-089
Environment-Induced Electrostatic Discharges as the Cause of Voyager 1 Power-On Resets A86-054

Safety

Catastrophic Heat Load on a Solid-Hydrogen Dewar A86-074
Threat-Strategy Technique: A System Safety Tool for Advanced Design A86-036

Sensor Systems

Measurement of Particle Contamination A86-111
The Upper Atmosphere Composition Spectrometer A86-056
Space Vehicle Glow Measurements on STS 41-D A86-034

Space Processing

Applications to Space Operations of Free-Flying, Controlled Streams of Liquids A86-072

System Identification

Aerothermodynamic Parameter Estimation from Shuttle Thermocouple Data During Transient Flight Test Maneuvers A86-079

Launch Vehicle and Missile (LV/M) Technology

Aerodynamic Heating and Ablation

Shock Tunnel Measurements of Heat Transfer in a Model Scramjet A86-081
Hypersonic Finite-Rate Chemically Reacting Viscous Flows over an Ablating Carbon Surface A86-007

Aerodynamics

Second-Order Roll Damping of Rolling Wings at Supersonic Speeds A86-116
A Split-Canard Configuration for Improved Control at High Angles of Attack A86-102
Thermal Environment Around the Space Shuttle with Hot-Gas Jets for Ice Suppression A86-097
Supersonic Flow over a Cruciform Configuration at Angle of Attack A86-078
A Parabolized Navier-Stokes Prediction of Hypersonic Window Cooling A86-048
Comparison of Various Drag Coefficient Expansions Using Polynomials and Splines A86-045
Prediction of Flowfields About Bodies of Revolution at Large Incidence A86-043
Magnus Effects at High Angles of Attack and Critical Raynolds Numbers A86-042
Parametric Investigations of Slender Cone Nose Bluntness Effects A86-023
Roll Damping of Cruciform-Tailed Missiles A86-019
Magnus Effects on Spinning Transonic Finned Missiles A86-005

Configurational Design

A Split-Canard Configuration for Improved Control at High Angles of Attack A86-102

Dynamics and Control

Dynamic Stability Tests on Finned Bodies at Hypersonic Mach Number A86-117
Roll Damping of Cruciform-Tailed Missiles A86-019

Launch Vehicle Systems

Propulsion Evaluation for Orbit-on-Demand Vehicles A86-106
Companion: An Economical Adjunct to the Space Shuttle A86-093
Three-Dimensional Thermal Analysis for the Inertial Upper Stage SRM-1 Techroll Housing A86-077
Magnetic Propulsion Along an Orbiting Grain Stream A86-026

Missile Systems

Roll Damping of Cruciform-Tailed Missiles A86-019

Mission Studies and Economics

Re-Entry Module for a Shuttle-Derived Vehicle Launch System A86-012

Propulsion and Propellant Systems

Comparison of Methane and Propane Rockets A86-115
Digital Data Analysis Techniques for Extraction of Slosh Model Parameters A86-031
Analytical Study of Reusable Flight-Weight Cryogenic Propellant Tank Designs A86-028

Sounding Rocket Systems

Active Control of Asymmetric Vortex Effects in a Circular Cylinder A86-025

Structural Design (including Loads)

Component Mode Synthesis Methods for Test-Based, Rigidly Connected Flexible Components A86-053
Analytical Study of Reusable Flight-Weight Cryogenic Propellant Tank Designs A86-028

Subsystem Design and Ground Support

Axisymmetric Stress Fields in Involute Bodies of Revolution A86-030

Testing, Flight and Ground

Comparison of Various Drag Coefficient Expansions Using Polynomials and Splines A86-045
Magnus Effects at High Angles of Attack and Critical Reynolds Numbers A86-042
Magnus Effects on Spinning Transonic Finned Missiles A86-005

Propulsion

Airbreathing Propulsion

Thrust Vector Control Utilizing Asymmetric Jet Nozzles A86-113
Shock Tunnel Measurements of Heat Transfer in a Model Scramjet A86-081
Three-Dimensional, Primitive-Variable Model for Solid-Fuel Ramjet Combustion A86-017

Combustion and Combustor Designs

Shock Tunnel Measurements of Heat Transfer in a Model Scramjet A86-081
Three-Dimensional, Primitive-Variable Model for Solid-Fuel Ramjet Combustion A86-017

Electric and Advanced Space Propulsion

Magnetic Propulsion Along an Orbiting Grain Stream A86-026

Engine Performance

Companion: An Economical Adjunct to the Space Shuttle A86-093

Environmental Effects

Radiative Lifetime Analysis of the Shuttle Optical Glow A86-110
Thrust Loss Due to Plume Impingement Effects A86-098
Thermal Environment Around the Space Shuttle with Hot-Gas Jets for Ice Suppression A86-097
Environment-Induced Electrostatic Discharges as the Cause of Voyager 1 Power-On Resets A86-054

Fuels and Propellants, Properties of

Propulsion Evaluation for Orbit-on-Demand Vehicles A86-106
Boron Slurry-Fueled Jet Engine Exhaust Plume Infrared Signatures A86-090
A Calorimetric Bomb for Determining Heats of Combustion of Hypergolic Propellants A86-020
Prediction of Burning Rates in Nozzleless Rocket Motors A85-059

Liquid Rocket Engines and Missile Systems

Propulsion Evaluation for Orbit-on-Demand Vehicles A86-106
Companion: An Economical Adjunct to the Space Shuttle A86-093
LEASAT Liquid Apogee Motor Subsystem Performance A86-091
Attitude Control Thruster Plume Flow Modeling and Experiments A86-082
Pitot Pressure and Heat-Transfer Measurements in Hydrazine Thruster Plumes A86-062
Performance Analysis of Scarfed Nozzles A86-008

Nuclear Propulsion Systems

Calculation of Carbon Ablation on a Re-Entry Body During Supersonic/Subsonic Flight A86-084

Solid and Hybrid Rocket Engines

Design and Optimization of Propulsion Systems Employing Scarfed Nozzles A86-104
Stress Response of Rocket Motors to Environmental Thermal Loads A86-089
Three-Dimensional Flow in Rotating Rocket Motor Nozzles A86-037
A Calorimetric Bomb for Determining Heats of Combustion of Hypergolic Propellants A86-020
Performance Analysis of Scarfed Nozzles A86-008
Prediction of Burning Rates in Nozzleless Rocket Motors A85-059

Spacecraft Technology

Configurational and Structural Design (including Loads)

Finite-Element Thermal-Structural Analyses of a Cable-Stiffened Orbiting Antenna A86-107
Preload Modeling, Analysis, and Optimal Design Techniques for Beam/Rod/Cable Element Structures A86-052
Dynamic Characteristics of Statically Determinate Space-Truss Platforms A86-051

Data Sensing, Presentation, and Transmission

The Upper Atmosphere Composition Spectrometer A86-056

Dynamics and Control

Analysis of Design Tradeoffs for Passively Damped Structural Joints A86-101
Component Mode Synthesis Methods for Test-Based, Rigidly Connected Flexible Components A86-053
Effect of Degradation of Material Properties on the Dynamic Response of Large Space Structures A86-050
Damping Synthesis for a Spacecraft Using Substructure and Component Data A86-029
Dynamic Analysis of a Deployable Space Structure A86-015

Earth-Orbital Trajectories

Satellite Debris: Recent Measurements A86-057
Determining Atmospheric Density Using a Space-Launched Projectile A86-047
Quasicircular Ground Tracks for Geosynchronous Earth Satellites A86-027

Electric Power

Computer Simulation of Plasma Electron Collection by PIX-II A86-088
Circuit Transients due to Arcs on a High-Voltage Solar Array A86-086

Entry Vehicle Aerodynamic Heating

Aerothermodynamic Parameter Estimation from Shuttle Thermocouple Data During Transient Flight Test Maneuvers A86-079
Thermal Design of Aeroassisted Orbital Transfer Vehicle Heat Shields for a Conical Drag Brake A86-076
Thermal Response of Integral, Multicomponent Composite Thermal Protection Systems A86-073
Numerical Solution of Space Shuttle Orbiter Flowfield Including Real-Gas Effects A86-046
Measured and Predicted Heating Distributions for Biconics at Mach 10 A86-044
Hypersonic Finite-Rate Chemically Reacting Viscous Flows over an Ablating Carbon Surface A86-007

Entry Vehicle Aerodynamics

A New Hypothesis for Transition on the Windward Face of the Space Shuttle A86-105
Evaluation of Boundary-Layer and Parabolized Navier-Stokes Solutions for Re-Entry Vehicles A86-010
Rarefied-Flow Aerodynamics and Thermosphere Structure from Shuttle Flight Measurements A86-003

Entry Vehicle Structural Design

Analytical Study of Reusable Flight-Weight Cryogenic Propellant Tank Designs A86-028

Extra-Vehicular Activity

Path-Constrained Rendezvous: Necessary and Sufficient Conditions A86-085

Habitability, Crew Training, and Life Support

Threat-Strategy Technique: A System Safety Tool for Advanced Design A86-036

Lunar and Interplanetary Trajectories

Tethers and Asteroids for Artificial Gravity Assist in the Solar System A86-011

Meteoroid and Radiation Protection

Satellite Debris: Recent Measurements A86-057
Shielding Distribution for Anisotropic Radiation in Low Earth Orbit A86-016

Mission Analysis

Path-Constrained Rendezvous: Necessary and Sufficient Conditions A86-085
Space Shuttle Orbiter Molecular Environment Induced by the Supplemental Flash Evaporator System A86-066
Quasicircular Ground Tracks for Geosynchronous Earth Satellites A86-027
Inertial Coordinate Representation of Mission Analysis Problems A86-018
Tethers and Asteroids for Artificial Gravity Assist in the Solar System A86-011

Propulsion Systems Integration

Thrust Loss Due to Plume Impingement Effects A86-098
LEASAT Liquid Apogee Motor Subsystem Performance A86-091
Attitude Control Thruster Plume Flow Modeling and Experiments A86-082
Pitot Pressure and Heat-Transfer Measurements in Hydrazine Thruster Plumes A86-062

Signatures and Tracking

Boron Slurry-Fueled Jet Engine Exhaust Plume Infrared Signatures A86-090
Satellite Debris: Recent Measurements A86-057

Simulation

Circuit Transients due to Arcs on a High-Voltage Solar Array A86-086
Space Constructible Radiator On-Orbit Assembly A86-069
Dynamic Analysis of a Deployable Space Structure A86-015

Space Station Systems, Manned

A Consideration of Atomic Oxygen Interactions with the Space Station A86-087
Shielding Distribution for Anisotropic Radiation in Low Earth Orbit A86-016

Systems

An Estimate of the Outgassing of Space Payloads and Its Gaseous Influence on the Environment A86-065
Environment-Induced Electrostatic Discharges as the Cause of Voyager 1 Power-On Resets A86-054

Temperature Control

Conceptual Fluid-Dynamic Heat Rejection System for Space Station Application A86-099
Thermal Network Correction by the Optimization Method A86-094
Thermal Design of Aeroassisted Orbital Transfer Vehicle Heat Shields for a Conical Drag Brake A86-076
Effects of a Simulated Synchronous Altitude Environment on Contaminated Optical Solar Reflectors A86-067
Droplet Radiator Systems for Spacecraft Thermal Control A86-002

Testing, Flight and Ground

Experimental Characterization of Passively Damped Joints for Space Structures A86-100
Material Damping of Simple Structures in a Simulated Space Environment A86-049
Extension of Ground-Based Testing for Large Space Structures A86-033

Structural Mechanics and Materials

Materials, Properties of

Electron Radiation Effects on the Thermal Expansion of Graphite Resin Composites A86-108
A Consideration of Atomic Oxygen Interactions with the Space Station A86-087
Analyses of Spacecraft Polymeric Materials A86-060
Material Damping of Simple Structures in a Simulated Space Environment A86-049

Structural Composite Materials

Electron Radiation Effects on the Thermal Expansion of Graphite Resin Composites A86-108
Thermal Response of Integral, Multicomponent Composite Thermal Protection Systems A86-073
Effect of Degradation of Material Properties on the Dynamic Response of Large Space Structures A86-050
Axisymmetric Stress Fields in Involute Bodies of Revolution A86-030

Structural Design

Analysis of Design Tradeoffs for Passively Damped Structural Joints A86-101
Preload Modeling, Analysis, and Optimal Design Techniques for Beam/Rod/Cable Element Structures A86-052

Structural Durability (including Fatigue and Fracture)

Effect of Degradation of Material Properties on the Dynamic Response of Large Space Structures A86-050
Predicted Temperature Field in a Thermomechanically Heated Viscoplastic Space Truss Structure A86-032

Structural Dynamics

Analysis of Design Tradeoffs for Passively Damped Structural Joints A86-101
Experimental Characterization of Passively Damped Joints for Space Structures A86-100
Component Mode Synthesis Methods for Test-Based, Rigidly Connected Flexible Components A86-053
Dynamic Characteristics of Statically Determinate Space-Truss Platforms A86-051
Material Damping of Simple Structures in a Simulated Space Environment A86-049
Extension of Ground-Based Testing for Large Space Structures A86-033
Damping Synthesis for a Spacecraft Using Substructure and Component Data A86-029
Dynamic Analysis of a Deployable Space Structure A86-015
Dynamic Response and Collapse of Slender Guyed Booms for Space Application A86-013

Structural Statics

Preload Modeling, Analysis, and Optimal Design Techniques for Beam/Rod/Cable Element Structures A86-052

Thermal Stresses

Finite-Element Thermal-Structural Analyses of a Cable-Stiffened Orbiting Antenna A86-107
Stress Response of Rocket Motors to Environmental Thermal Loads A86-089
Predicted Temperature Field in a Thermomechanically Heated Viscoplastic Space Truss Structure A86-032
Radiative and Convective Effects on the Vibrational Heating of Semitransparent Polymers A86-022

Thermophysics and Thermochemistry

Ablation, Pyrolysis, Thermal Decomposition and Degradation (including Refractories)

Calculation of Carbon Ablation on a Re-Entry Body During Supersonic/Subsonic Flight A86-084
An Estimate of the Outgassing of Space Payloads and Its Gaseous Influence on the Environment A86-065
Effect of Heating Rate on Thermal Decomposition Kinetics of Fiberglass Phenolic A86-058
Response of Inconel 617 to Sea Salt and Re-Entry Conditions A86-014
High-Pressure Ablation Measurements in the AEDC Track G A86-001

Experimental Methods of Diagnostics

Solar Array "Hot-Spot" Testing and Analysis A86-070
High-Pressure Ablation Measurements in the AEDC Track G A86-001

Heat Conduction

Three-Dimensional Thermal Analysis for the Inertial Upper Stage SRM-1 Techroll Housing A86-077
The Effect of Geometry on Contact Conductance of Contiguous Interfaces A86-040

Heat Pipes

Excess Liquid Formation in Orbit Test Results of Axially Grooved Heat Pipes A86-083
Performance Characteristics of Gravity-Assisted Potassium Heat Pipes A86-071
Space Constructible Radiator On-Orbit Assembly A86-069

Radiation and Radiative Heat Transfer

Radiative Lifetime Analysis of the Shuttle Optical Glow A86-110
Thermal Network Correction by the Optimization Method A86-094
Feasibility Study of a Low-Temperature Expandable Megawatt Pulse Power Radiator A86-092
Development of the Payload Module Radiator for the Broadcasting Satellite A86-061
Predicted Temperature Field in a Thermomechanically Heated Viscoplastic Space Truss Structure A86-032
Droplet Radiator Systems for Spacecraft Thermal Control A86-002

Thermal Control

Conceptual Fluid-Dynamic Heat Rejection System for Space Station Application A86-099
Space Constructible Radiator On-Orbit Assembly A86-069
Effects of a Simulated Synchronous Altitude Environment on Contaminated Optical Solar Reflectors A86-067
Cryogenic and Thermal Design for the Space Infrared Telescope Facility (SIRTF) A86-004

Thermal Modeling and Analysis

Finite-Element Thermal-Structural Analyses of a Cable-Stiffened Orbiting Antenna A86-107
Thermal Network Correction by the Optimization Method A86-094
Aerothermodynamic Parameter Estimation from Shuttle Thermocouple Data During Transient Flight Test Maneuvers A86-079
Three-Dimensional Thermal Analysis for the Inertial Upper Stage SRM-1 Techroll Housing A86-077
Thermal Response of Integral, Multicomponent Composite Thermal Protection Systems A86-073
Solar Array "Hot-Spot" Testing and Analysis A86-070
Development of the Payload Module Radiator for the Broadcasting Satellite A86-061
Thermal Analysis Technique Applied to a Conformal Phased Array Antenna A86-041
The Effect of Geometry on Contact Conductance of Contiguous Interfaces A86-040
Three-Dimensional, Primitive-Variable Model for Solid-Fuel Ramjet Combustion A86-017
Cryogenic and Thermal Design for the Space Infrared Telescope Facility (SIRTF) A86-004
Droplet Radiator Systems for Spacecraft Thermal Control A86-002

Thermal Surface Properties

Measurement of Particle Contamination A86-111
Effects of a Simulated Synchronous Altitude Environment on Contaminated Optical Solar Reflectors A86-067
Space Vehicle Glow Measurements on STS 41-D A86-034
Response of Inconel 617 to Sea Salt and Re-Entry Conditions A86-014

Thermochemistry and Chemical Kinetics

Orbital Supply of Liquid Helium A86-068
Effect of Heating Rate on Thermal Decomposition Kinetics of Fiberglass Phenolic A86-058
Determining Atmospheric Density Using a Space-Launched Projectile A86-047
A Calorimetric Bomb for Determining Heats of Combustion of Hypergolic Propellants A86-020

Thermophysical Properties of Matter

Electron Radiation Effects on the Thermal Expansion of Graphite Resin Composites A86-108
Orbital Supply of Liquid Helium A86-068

Chronological Index

A85-059 Prediction of Burning Rates in Nozzleless Rocket Motors. Merrill K. King, *Atlantic Research Corporation* (**22**, 4, p. 394) Synoptic based on AIAA Paper 82-1200
Errata by Merrill K. King, *Atlantic Research Corporation* (**23**, 5, p. 544)

A86-001 High-Pressure Ablation Measurements in the AEDC Track G. J. J. Matty, *Arnold Engineering Development Center, Arnold Air Force Station* (**23**, 1, p. 4) Article based on AIAA Paper 84-1804

A86-002 Droplet Radiator Systems for Spacecraft Thermal Control. Robert T. Taussig, *Spectra Technology, Incorporated*; and A. T. Mattick, *University of Washington* (**23**, 1, p. 10) Article based on AIAA Paper 84-1797

A86-003 Rarefied-Flow Aerodynamics and Thermosphere Structure from Shuttle Flight Measurements. Robert C. Blanchard and Gregory M. Buck, *NASA Langley Research Center* (**23**, 1, p. 18) Article based on AIAA Paper 85-0347

A86-004 Cryogenic and Thermal Design for the Space Infrared Telescope Facility (SIRTF). J. H. Lee and W. F. Brooks, *NASA Ames Research Center* (**23**, 1, p. 25) Article based on AIAA Paper 84-1776

A86-005 Magnus Effects on Spinning Transonic Finned Missiles. Arnan Seginer, *Technion--Israel Institute of Technology*; and Izhak Rosenwasser, *Israel Aircraft Industries* (**23**, 1, p. 31) Article based on AIAA Paper 83-2146 CP836

A86-006 Three-Dimensional Refraction/Diffraction of Electromagnetic Waves Through Rocket Exhaust Plumes. A. J. Senol and G. L. Romine, *Martin Marietta Corporation* (**23**, 1, p. 39) Article based on AIAA Paper 84-1967

A86-007 Hypersonic Finite-Rate Chemically Reacting Viscous Flows over an Ablating Carbon Surface. D. J. Song, *Virginia Polytechnic Institute and State University*; and Clark H. Lewis, *VRA, Inc.* (**23**, 1, p. 47) Article based on AIAA Paper 84-1731

A86-008 Performance Analysis of Scarfed Nozzles. Jay S. Lilley, *U. S. Army Missile Command, Redstone Arsenal*; and Joe D. Hoffman, *Purdue University* (**23**, 1, p. 55) Article based on AIAA Paper 84-1416

A86-009 Application of a Full Potential Method for Predicting Supersonic Flowfields and Aerodynamic Characteristics. Kenneth M. Jones, *NASA Langley Research Center* (**23**, 1, p. 63) Article based on AIAA Paper 83-1802

A86-010 Evaluation of Boundary-Layer and Parabolized Navier-Stokes Solutions for Re-Entry Vehicles. Mary McWherter, Ralph W. Noack and William L. Oberkampf, *Sandia National Laboratories* (**23**, 1, p. 70) Article based on AIAA Paper 84-0486

A86-011 Tethers and Asteroids for Artificial Gravity Assist in the Solar System. Paul A. Penzo and Harris L. Mayer, *Jet Propulsion Laboratory, California Institute of Technology* (**23**, 1, p. 79) Article based on AIAA Paper 84-2056

A86-012 Re-Entry Module for a Shuttle-Derived Vehicle Launch System. J. R. Tewell and E. S. Ewing, *Martin Marietta Aerospace*; and D. E. Florence, *General Electric Space Division* (**23**, 1, p. 83) Article based on AIAA Paper 83-1797

A86-013 Dynamic Response and Collapse of Slender Guyed Booms for Space Application. J. M. Housner and W. K. Belvin, *NASA Langley Research Center* (**23**, 1, p. 88) Article based on AIAA Paper 83-0821 CP831

A86-014 Response of Inconel 617 to Sea Salt and Re-Entry Conditions. Ronald K. Clark, *NASA Langley Research Center*; and Jalaiah Unnam, *Analytical Services and Materials Inc.* (**23**, 1, p. 96) Article based on AIAA Paper 84-1768

A86-015 Dynamic Analysis of a Deployable Space Structure. G. E. Weeks, *The University of Alabama* (**23**, 1, p. 102) Article based on AIAA Paper 85-0593 CP851

A86-016 Shielding Distribution for Anisotropic Radiation in Low Earth Orbit. Mark W. Henley, *General Dynamics Space Systems Division* (23, 1, p. 108) Article

A86-017 Three-Dimensional, Primitive-Variable Model for Solid-Fuel Ramjet Combustion. T. Milshtein and D. W. Netzer, *Naval Postgraduate School* (23, 1, p. 113) Article

A86-018 Inertial Coordinate Representation of Mission Analysis Problems. J. C. Kosik, *Centre National d'Etudes Spatiales, France* (23, 1, p. 118) Engineering Note

A86-019 Roll Damping of Cruciform-Tailed Missiles. Donald W. Eastman, *Boeing Aerospace Company* (23, 1, p. 119) Engineering Note

A86-020 A Calorimetric Bomb for Determining Heats of Combustion of Hypergolic Propellants. S. R. Jain and G. Rajendran, *Indian Institute of Science* (23, 1, p. 120) Engineering Note

A86-021 Charging of a Manned Maneuvering Unit in the Shuttle Wake. Allen G. Rubin and Arthur Besse, *Air Force Geophysics Laboratory, Hanscom Air Force Base* (23, 1, p. 122) Engineering Note based on AIAA Paper 83-2612

A86-022 Radiative and Convective Effects on the Vibrational Heating of Semitransparent Polymers. I. S. Habib, *University of Michigan* (23, 1, p. 124) Engineering Note

A86-023 Parametric Investigations of Slender Cone Nose Bluntness Effects. L. E. Ericsson, *Lockheed Missiles & Space Company, Inc.* (23, 1, p. 126) Engineering Note

A86-024 Unsteady Embedded Newton-Busemann Flow Theory. Bing-Gang Tong and W. H. Hui, *University of Waterloo, Canada* (23, 2, p. 129) Article

A86-025 Active Control of Asymmetric Vortex Effects in a Circular Cylinder. Takashi Abe and Katushi Funabiki, *Institute of Space and Astronautical Science, Japan* (23, 2, p. 136) Article based on AIAA Paper 84-2101 CP849

A86-026 Magnetic Propulsion Along an Orbiting Grain Stream. Benoit A. Lebon, *Centre National d'Etudes Spatiales, France* (23, 2, p. 141) Article

A86-027 Quasicircular Ground Tracks for Geosynchronous Earth Satellites. Jerry K. Cline, *McDonnell Douglas Astronautics Company*; and Philip C. Almes, *Wayland Baptist University* (23, 2, p. 144) Article

A86-028 Analytical Study of Reusable Flight-Weight Cryogenic Propellant Tank Designs. Allan H. Taylor, *NASA Langley Research Center*; Jeffrey A. Cerro, *PRC Kentron Inc.*; and L. Robert Jackson, *NASA Langley Research Center* (23, 2, p. 149) Article based on AIAA Paper 84-0865 CP844

A86-029 Damping Synthesis for a Spacecraft Using Substructure and Component Data. K. W. Lips and F. R. Vigneron, *Department of Communications, Canada* (23, 2, p. 158) Article based on AIAA Paper 84-1053 CP844

A86-030 Axisymmetric Stress Fields in Involute Bodies of Revolution. N. J. Pagano, *Air Force Wright Aeronautical Laboratories, Wright- Patterson Air Force Base* (23, 2, p. 165) Article

A86-031 Digital Data Analysis Techniques for Extraction of Slosh Model Parameters. J. F. Unruh, D. D. Kana, F. T. Dodge and T. A. Fey, *Southwest Research Institute* (23, 2, p. 171) Article based on AIAA Paper 85-0813 CP851

A86-032 Predicted Temperature Field in a Thermomechanically Heated Viscoplastic Space Truss Structure. D. H. Allen and W. E. Haisler, *Texas A&M University* (23, 2, p. 178) Article based on AIAA Paper 85-0829 CP851

A86-033 Extension of Ground-Based Testing for Large Space Structures. B. K. Wada, C. P. Kui and R. J. Glaser, *Jet Propulsion Laboratory, California Institute of Technology* (23, 2, p. 184) Article based on AIAA Paper 85-0757 CP851

A86-034 Space Vehicle Glow Measurements on STS 41-D. S. B. Mende and G. R. Swenson, *Lockheed Palo Alto Research Laboratory*; K. S. Clifton and R. Gause, *NASA Marshall Space Flight Center*; L. Leger and O. K. Garriott, *NASA Johnson Space Center* (23, 2, p. 189) Article based on AIAA Paper 85-0475

A86-035 Vehicle Charging Observed in SEPAC Spacelab-1 Experiment. Susumu Sasaki, *Institute of Space and Astronautical Science,Japan*; Nobuki Kawashima, Kyoichi, Kuriki, Masahisa Yanagisawa and Tatsuzo Obayashi, *Institute of Space and Astronautical Science, Japan* (23, 2, p. 194) Article

A86-036 Threat-Strategy Technique: A System Safety Tool for Advanced Design. R. L. Peercy Jr. and R. F. Raasch, *Rockwell International* (23, 2, p. 200) Article based on AIAA Paper 85-0397

A86-037 Three-Dimensional Flow in Rotating Rocket Motor Nozzles. Jeffrey J. Brown, *Boeing Commercial Airplane Company*; and Joe D. Hoffman, *Purdue University* (23, 2, p. 207) Article based on AIAA Paper 84-0260

A86-038 Aluminized Propellants and a Method Defining Low-Altitude Exhaust Plumes. E. T. Piesik, *General Dynamics Corporation* (23, 2, p. 215) Article

A86-039 A New Rotating Parachute Design Having High Performance. William B. Pepper Jr., *Sandia National Laboratories, New Mexico* (23, 2, p. 222) Article based on AIAA Paper 84-0808 CP843

A86-040 The Effect of Geometry on Contact Conductance of Contiguous Interfaces. B. J. Rozon, P. F. Galpin, G. E. Schneider and M. M. Yovanovich, *University of Waterloo, Canada* (23, 3, p. 225) Article based on AIAA Paper 84-1746

A86-041 Thermal Analysis Technique Applied to a Conformal Phased Array Antenna. Kevin Campion, Joseph J. Gallagher, Leo R. Paradis and Francis A. Shukis, *Raytheon Company* (23, 3, p. 231) Article based on AIAA Paper 84-1762

A86-042 Magnus Effects at High Angles of Attack and Critical Reynolds Numbers A. Seginer and M. Ringel, *Technion--Israel Institute of Technology* (23, 3, p. 237) Article based on AIAA Paper 83-2145 CP836

A86-043 Prediction of Flowfields About Bodies of Revolution at Large Incidence. K.-Y. Chien, A. H. Van Tuyl and T. Hsieh, *Naval Surface Weapons Center* (23, 3, p. 245) Article based on AIAA Paper 84-0506

A86-044 Measured and Predicted Heating Distributions for Biconics at Mach 10. Charles G. Miller, Peter A. Gnoffo and Sue E. Wilder, *NASA Langley Research Center* (23, 3, p. 251) Article

A86-045 Comparison of Various Drag Coefficient Expansions Using Polynomials and Splines. Sally M. Sabot and G. L. Winchenbach, *Air Force Armament Laboratory, Eglin Air Force Base*; and G. T. Chapman, *NASA Ames Research Center* (23, 3, p. 259) Article based on AIAA Paper 84-2113 CP849

A86-046 Numerical Solution of Space Shuttle Orbiter Flowfield Including Real-Gas Effects. Dinesh K. Prabhu and J. C. Tannehill, *Iowa State University* (23, 3, p. 264) Article based on AIAA Paper 84-1747

A86-047 Determining Atmospheric Density Using a Space-Launched Projectile. Gene P. Menees and Chul Park, *NASA Ames Research Center*; John F. Wilson, *Informatics General Corporation*; and Kevin G. Brown, *NASA Ames Research Center* (23, 3, p. 273) Article based on AIAA Paper 85-0327

A86-048 A Parabolized Navier-Stokes Prediction of Hypersonic Window Cooling. Gregory J. Banken and Donald W. Roberts, *Amtec Engineering, Inc.*; J. Eric Holcomb and Stanley F. Birch, *Boeing Aerospace Company* (23, 3, p. 281) Article based on AIAA Paper 85-1591

A86-049 Material Damping of Simple Structures in a Simulated Space Environment. Donald L. Edberg, *Stanford University* (23, 3, p. 288) Article

A86-050 Effect of Degradation of Material Properties on the Dynamic Response of Large Space Structures. S. Kalyanasundaram, J. D. Lutz, W. E. Haisler and D. H. Allen, *Texas A&M University* (23, 3, p. 297) Article based on AIAA Paper 85-0778 CP851

A86-051 Dynamic Characteristics of Statically Determinate Space-Truss Platforms. M. S. Anderson, *NASA Langley Research Center*; and N. A. Nimmo, *Old Dominion University* (23, 3, p. 303) Article based on AIAA Paper 85-0819 CP851

A86-052 Preload Modeling, Analysis, and Optimal Design Techniques for Beam/Rod/Cable Element Structures. Rong C. Shieh, *MRJ, Inc.* (23, 3, p. 308) Article based on AIAA Paper 85-0692 CP851

A86-053 Component Mode Synthesis Methods for Test-Based, Rigidly Connected Flexible Components. Mary Baker, *Structural Dynamics Research Center* (23, 3, p. 316) Article based on AIAA Paper 84-0943 CP844

A86-054 Environment-Induced Electrostatic Discharges as the Cause of Voyager 1 Power-On Resets. P. Leung, A. C. Whittlesey, H. B. Garrett and P. A. Robinson Jr., *Jet Propulsion Laboratory, California Institute of Technology* (23, 3, p. 323) Article

A86-055 Space Plasma Physics Results from Spacelab 1. J. L. Burch, *Southwest Research Institute* (23, 3, p. 331) Article based on AIAA Paper 85-0150

A86-056 The Upper Atmosphere Composition Spectrometer. D. C. Kayser, W. T. Chater, C. K. Howey and J. B. Pranke, *The Aerospace Corporation* (23, 3, p. 336) Article

A86-057 Satellite Debris: Recent Measurements. L. G. Taff, *Massachusetts Institute of Technology* (23, 3, p. 342) Article

A86-058 Effect of Heating Rate on Thermal Decomposition Kinetics of Fiberglass Phenolic. K. N. Ninan, *Vikram Sarabhai Space Centre, India* (23, 3, p. 347) Engineering Note

A86-059 Turbulent Reynolds Analogy Factors of Stacked Large-Eddy Breakup Devices. A. Margrethe Lindemann, *NASA Langley Research Center* (23, 3, p. 348) Engineering Note

A86-060 Analyses of Spacecraft Polymeric Materials. S. D. Worley, C. H. Dai, J. L. Graham, A. T. Fromhold and K. Daneshvar, *Auburn University*; A. F. Whitaker and S. A. Little, *NASA Marshall Space Flight Center* (23, 3, p. 350) Engineering Note

A86-061 Development of the Payload Module Radiator for the Broadcasting Satellite. Y. Kuriyama, J. Kawashima, K. Kushida and T. Itakura, *Toshiba Corporation, Japan* (23, 4, p. 355) Synoptic based on AIAA Paper 85-1013

A86-062 Pitot Pressure and Heat-Transfer Measurements in Hydrazine Thruster Plumes. H. Legge and G. Dettleff, *Deutsche Forschungs- und Versuchsanstalt für Luft- und Raumfahrt, Germany* (23, 4, p. 357) Article based on AIAA Paper 85-0934

A86-063 Rocket Nozzle Lip Flow by Direct Simulation Monte Carlo Method. J. E. Hueser, *Old Dominion University*; L. T. Melfi Jr., *NASA Langley Research Center*; G. A. Bird, *University of Sydney, Australia*; and F. J. Brock, *Old Dominion University* (23, 4, p. 363) Article based on AIAA Paper 85-0995

A86-064 Experimental Study of the Plume Impingement Problem Associated with Rocket Stage Separation. J. Allegre, *Société d'Etudies de Constructions et de Services pour Souffleries et Installations Aérothermodynamiques, France*; M. Raffin, *Société d'Etudies de Constructions et de Services pour Souffleries et Installations Aérothermodynamiques, France*; and J. C. Lengrand, *Centre National de la Recherche Scientifique, France* (23, 4, p. 368) Article based on AIAA Paper 85-0930

A86-065 An Estimate of the Outgassing of Space Payloads and Its Gaseous Influence on the Environment. John J. Scialdone, *NASA Goddard Space Flight Center* (23, 4, p. 373) Article based on AIAA Paper 85-0957

A86-066 Space Shuttle Orbiter Molecular Environment Induced by the Supplemental Flash Evaporator System. H. K. F. Ehlers, *NASA Johnson Space Center* (23, 4, p. 379) Article based on AIAA Paper 85-0951

A86-067 Effects of a Simulated Synchronous Altitude Environment on Contaminated Optical Solar Reflectors. J. A. Neff, C. R. Mullen and L. B. Fogdall, *Boeing Aerospace Company* (23, 4, p. 386) Article based on AIAA Paper 85-0954

A86-068 Orbital Supply of Liquid Helium. Peter Kittel, *NASA Ames Research Center* (23, 4, p. 391) Article based on AIAA Paper 85-0959

A86-069 Space Constructible Radiator On-Orbit Assembly. P.J. Otterstedt, J. Hussey and J.P. Alario, *Grumman Aerospace Corporation* (23, 4, p. 397) Article based on AIAA Paper 85-1048

A86-070 Solar Array "Hot-Spot" Testing and Analysis. Peter Papula, *RCA Astro-Electronics*; and Carole Stowell, *General Electric Company* (23, 4, p. 401) Article based on AIAA Paper 85-1080

A86-071 Performance Characteristics of Gravity-Assisted Potassium Heat Pipes. F. C. Prenger, *Astronautics Technology Center*; E. S. Keddy and J. T. Sena, *Los Alamos National Laboratory* (23, 4, p. 407) Article based on AIAA Paper 85-1086

A86-072 Applications to Space Operations of Free-Flying, Controlled Streams of Liquids. E. P. Muntz and Melissa Dixon, *University of Southern California* (23, 4, p. 411) Article based on AIAA Paper 85-1029

A86-073 Thermal Response of Integral, Multicomponent Composite Thermal Protection Systems. David A. Stewart and Daniel B. Leiser, *NASA Ames Research Center*; Paul Kolodziej, *Sterling Software*; and Marnell Smith, *NASA Ames Research Center* (23, 4, p. 420) Article based on AIAA Paper 85-1056

A86-074 Catastrophic Heat Load on a Solid-Hydrogen Dewar. C. K. Liu, L. G. Naes and A. F. Manikowski Jr., *Lockheed Palo Alto Research Laboratories* (23, 4, p. 428) Article based on AIAA Paper 85-0960

A86-075 Computation of Low-Density Supersonic Flow over a Pitot Tube. Michael C. Cline, Jack C. Hyde and Richard A. Gentry, *Los Alamos National Laboratory* (23, 4, p. 436) Article based on AIAA Paper 85-1032

A86-076 Thermal Design of Aeroassisted Orbital Transfer Vehicle Heat Shields for a Conical Drag Brake. W. C. Pitts, *NASA Ames Research Center*; and M. S. Murbach, *Informatics General Corporation* (23, 4, p. 442) Article based on AIAA Paper 85-1052

A86-077 Three-Dimensional Thermal Analysis for the Inertial Upper Stage SRM-1 Techroll Housing. I-Shih Chang, *The Aerospace Corporation* (23, 5, p. 449) Synoptic based on AIAA Paper 85-1022

A86-078 Supersonic Flow over a Cruciform Configuration at Angle of Attack. Anthony M. Agnone, *New York University, Antonio Ferri Laboratories* (23, 5, p. 451) Synoptic based on AIAA Paper 84-0507

A86-079 Aerothermodynamic Parameter Estimation from Shuttle Thermocouple Data During Transient Flight Test Maneuvers. James K. Hodge and David R. Audley, *Air Force Institute of Technology, Wright-Patterson Air Force Base* (23, 5, p. 453) Article

A86-080 Cone-Derived Waveriders with Longitudinal Curvature. M. L. Rasmussen and L. W. Clement, *University of Oklahoma* (23, 5, p. 461) Article based on AIAA Paper 84-2100

A86-081 Shock Tunnel Measurements of Heat Transfer in a Model Scramjet. R. G. Morgan and R. J. Stalker, *University of Queensland, Australia* (23, 5, p. 470) Article based on AIAA Paper 85-0908

A86-082 Attitude Control Thruster Plume Flow Modeling and Experiments. G. Dettleff, R.-D. Boettcher, C. Dankert, G. Koppenwallner and H. Legge, *DFVLR Institute for Experimental Fluid Mechanics, Federal Republic of Germany* (23, 5, p. 476) Article based on AIAA Paper 85-0933

A86-083 Excess Liquid Formation in Orbit Test Results of Axially Grooved Heat Pipes. R. Meyer, *MBB/ERNO Raumfahrttechnik GmbH, Federal Republic of Germnay*; U. Laux and R. Schlitt, *MBB/ERNO Raumfahrttechnik GmbH, Federal Republic of Germany* (23, 5, p. 482) Article based on AIAA Paper 85-1011

A86-084 Calculation of Carbon Ablation on a Re-Entry Body During Supersonic/Subsonic Flight. L. W. Hunter, L. L. Perini, D. W. Conn and P. T. Brenza, *The Johns Hopkins University/Applied Physics Laboratory* (23, 5, p. 487) Article based on AIAA Paper 85-0904

A86-085 Path-Constrained Rendezvous: Necessary and Sufficient Conditions. K. M. Soileau, *NASA Johnson Space Center*; and S. A. Stern, *University of Colorado* (23, 5, p. 492) Article

A86-086 Circuit Transients due to Arcs on a High-Voltage Solar Array. Roger N. Metz, *Colby College* (23, 5, p. 499) Article based on AIAA Paper 85-0385

A86-087 A Consideration of Atomic Oxygen Interactions with the Space Station. Lubert J. Leger and James T. Visentine, *NASA Johnson Space Center* (23, 5, p. 505) Article based on AIAA Paper 85-0476

A86-088 Computer Simulation of Plasma Electron Collection by PIX-II. M. J. Mandell, I. Katz and G. A. Jongeward, *S-Cubed*; and J. C. Roche, *NASA Lewis Research Center* (23, 5, p. 512) Article based on AIAA Paper 85-3896

A86-089 Stress Response of Rocket Motors to Environmental Thermal Loads. Surot Thangjitham and Robert A. Heller, *Virginia Polytechnic Institute and State University* (23, 5, p. 519) Article

A86-090 Boron Slurry-Fueled Jet Engine Exhaust Plume Infrared Signatures. H. F. Nelson, *Unniversity of Missouri--Rolla*; and E. O. Tucker, *University of Missouri--Rolla* (23, 5, p. 527) Article based on AIAA Paper 86-0465

A86-091 LEASAT Liquid Apogee Motor Subsystem Performance. Robert G. Henderson, *Hughes Aircraft Company*; and Gilbert F. Pasley, *Hughes Aircraft Comapny* (23, 5, p. 534) Article based on AIAA Paper 85-1380

A86-092 Feasibility Study of a Low-Temperature Expandable Megawatt Pulse Power Radiator. L. C. Chow, *University of Kentucky*; E. T. Mahefkey, *Air Force Wright Aeronautical Laboratories, Wright-Patterson Air Force Base*; and J. E. Yokajty, *Air Force Wright Aeronautical Laboratories, Wright-Patterson Air Foce Base* (23, 5, p. 539) Engineering Note based on AIAA Paper 85-1078

A86-093 Companion: An Economical Adjunct to the Space Shuttle. James A. Martin, *NASA Langley Research Center* (23, 5, p. 541) Engineering Note

A86-094 Thermal Network Correction by the Optimization Method. K. Badari Narayana and H. N. Murthy, *ISRO Satellite Centre, India* (23, 5, p. 542) Engineering Note

A86-096 Base Drag Determination for STS Flights 1-5. W. Pelham Phillips, *NASA Langley Research Center*; John T. Findlay, *Analytical Mechanics Associates Inc.*; and Harold R. Compton, *NASA Langley Research Center* (23, 6, p. 545) Synoptic based on AIAA Paper 83-2719

A86-097 Thermal Environment Around the Space Shuttle with Hot-Gas Jets for Ice Suppression. A. K. Singhal and L. T. Tam, *CHAM of North America Inc.*; F. Bachtel and J. Vaniman, *NASA Marshall Space Flight Center* (23, 6, p. 547) Article

A86-098 Thrust Loss Due to Plume Impingement Effects. E. Mayer, J. Hermel and A. W. Rogers, *Hughes Aircraft Company* (23, 6, p. 554) Article based on AIAA Paper 85-1157

A86-099 Conceptual Fluid-Dynamic Heat Rejection System for Space Station Application. Yasunori Kobayashi, *University of Tsukuba, Japan* (23, 6, p. 561) Article based on AIAA Paper 85-1051

A86-100 Experimental Characterization of Passively Damped Joints for Space Structures. Jacky Prucz, *West Virginia University*; A. D. Reddy and L. W. Rehfield, *Georgia Institute of Technology*; and R. W. Trudell, *McDonnell Douglas Astronautics Company* (23, 6, p. 568) Article based on AIAA Paper 85-0780 CP851

A86-101 Analysis of Design Tradeoffs for Passively Damped Structural Joints. Jacky Prucz, *West Virginia University* (23, 6, p. 576) Article based on AIAA Paper 85-0780 CP851

A86-102 A Split-Canard Configuration for Improved Control at High Angles of Attack. A. Katz, A. Davidovitch and D. Levin, *Technion--Israel Institute of Technology* (23, 6, p. 585) Article

A86-103 A Navier-Stokes Solution for a Bulbous Payload Shroud. Sharad C. Purohit, *Vikram Sarabhai Space Centre, India* (**23**, 6, p. 590) Article

A86-104 Design and Optimization of Propulsion Systems Employing Scarfed Nozzles. J. S. Lilley, *U.S. Army Missile Command* (**23**, 6, p. 597) Article based on AIAA Paper 85-1308

A86-105 A New Hypothesis for Transition on the Windward Face of the Space Shuttle. D. I. A. Poll, *Cranford Institute of Technology, England* (**23**, 6, p. 605) Article based on AIAA Paper 85-0899

A86-106 Propulsion Evaluation for Orbit-on-Demand Vehicles. James A. Martin and J. Chris Naftel, *NASA Langley Research Center*; and R. Victor Turriziani, *Kentron International* (**23**, 6, p. 612) Article based on AIAA Paper 85-1161

A86-107 Finite-Element Thermal-Structural Analyses of a Cable-Stiffened Orbiting Antenna. Earl A. Thornton and Pramote Dechaumphai, *Old Dominion University*; and Ajay K. Pandey, *Virginia Polytechnic Institute and State University* (**23**, 6, p. 620) Article based on AIAA Paper 85-0693 CP851

A86-108 Electron Radiation Effects on the Thermal Expansion of Graphite Resin Composites. David E. Bowles, Stephen S. Tompkins and George F. Sykes, *NASA Langley Research Center* (**23**, 6, p. 625) Article based on AIAA Paper 84-1704

A86-109 Evaluation of Free-Molecular Flow Passage Conductances with Thermal Radiation Analysis Software. Milford A. Peterson, *Lockheed Missiles & Space Company* (**23**, 6, p. 630) Article

A86-110 Radiative Lifetime Analysis of the Shuttle Optical Glow. J.-H. Yee and A. Dalgarno, *Harvard-Smithsonian Center for Astrophysics* (**23**, 6, p. 635) Article based on AIAA Paper 83-2660

A86-111 Measurement of Particle Contamination. Joseph G. Kelley, *Rockwell International Corporation* (**23**, 6, p. 641) Article based on AIAA Paper 85-7003 CP859

A86-112 Impact Damage of the Challenger Crew Compartment. Tomasz Wierzbicki and Dick K. Yue, *Massachusetts Institute of Technology* (**23**, 6, p. 646) Article

A86-113 Thrust Vector Control Utilizing Asymmetric Jet Nozzles. Gustave J. Hokenson, *The Hokenson Company* (**23**, 6, p. 655) Engineering Note

A86-114 $\bar{V}\times\bar{B}$ and Density Gradient Electric Fields Measured from Spacecraft. J.R. Lilley Jr., I. Katz and D. L. Cooke, *S-Cubed* (**23**, 6, p. 656) Engineering Note

A86-115 Comparison of Methane and Propane Rockets. James A. Martin, *NASA Langley Research Center* (**23**, 6, p. 658) Engineering Note

A86-116 Second-Order Roll Damping of Rolling Wings at Supersonic Speeds. Weikai Gu, *Academia Sinica, China* (**23**, 6, p. 659) Engineering Note

A86-117 Dynamic Stability Tests on Finned Bodies at Hypersonic Mach Number. G. R. Hutt and R. A. East, *The University of Southampton, England* (**23**, 6, p. 660) Engineering Note
